

Wind Resource Map of Idaho and Western Wyoming at 50m

TrueWind Solutions

Setting the Standard in Wind Mapping and Forecasting

Projection: Universal Transverse Mercator (Zone 11)
Spatial Resolution of Wind Resource Data: 400 m

This map was created by TrueWind Solutions using the Mesomap system and historical weather data. It has been validated with available surface data by the National Renewable Energy Laboratory. Although it is believed to represent an accurate overall picture of the wind energy resource, estimates at any location should be confirmed by measurement.
